

kirubel Menberu

Front-end Developer

Professional Summary

I am a passionate software developer with a strong background in building dynamic, user-focused web applications. My expertise spans modern frameworks and technologies, including React.js, Next.js, and Tailwind CSS, allowing me to create highly responsive and interactive user interfaces. In addition to front-end development, I have gained experience in ERP software development, specifically working with the Frappe framework and ERPNext, customizing and optimizing ERP systems to enhance business operations.

With a solid understanding of both front-end and back-end technologies, including junior-level experience with the MERN stack (MongoDB, Express, React, Node.js), I am skilled in developing scalable and high-performing applications. I take pride in translating design concepts into clean, visually appealing interfaces while ensuring the underlying systems are optimized for efficiency and functionality. My problem-solving abilities, attention to detail, and collaborative approach allow me to stay ahead of industry trends and continuously deliver high-quality solutions.

work experience

Software Developer | Frappe, ErpNext

Dec-2024 - current

Currently working as a Software Developer at Bluespark, specializing in the development and customization of ERPNext applications using the Frappe framework. My role involves designing and implementing scalable business solutions, including custom modules, automated workflows, and data integrations. I focus on creating efficient and user-friendly interfaces, while ensuring seamless functionality and optimization of back-end processes. I actively collaborate with clients and cross-functional teams to gather requirements, implement new features, and troubleshoot issues. My expertise extends to configuring and deploying ERPNext systems, maintaining database structures, and integrating third-party services to enhance system functionality. Through continuous learning and adaptation, I stay up-to-date with the latest ERP trends and development practices, ensuring the delivery of high-quality, maintainable solutions.

Front-end Developer

Aug-2024 - Dec-2024

Served as a Front-End Web App Developer at GoDigital, specializing in building dynamic, user-centric applications using Next.js. I focus on server-side rendering and optimization techniques to enhance performance and SEO. My proficiency includes integrating APIs and creating interactive, responsive interfaces, leveraging React.js as part of the Next.js framework. Additionally, I possess junior-level experience in full-stack development with the MERN stack (MongoDB, Express, React, Node.js), providing me with a well-rounded understanding of both front-end and back-end processes. I collaborate with cross-functional teams to implement innovative features, troubleshoot issues, and stay abreast of the latest industry trends and best practices in web development.

Front-end Developer

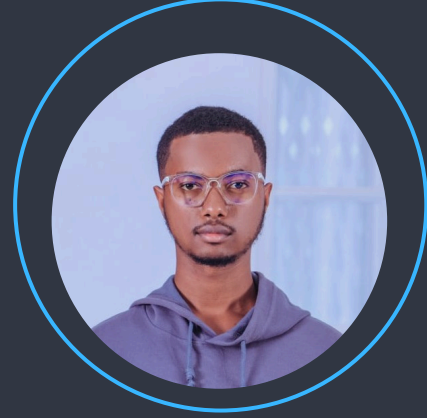

march-2024 - Aug-2024

Served as a Front-End Developer at Purpose Black, focusing on building high-performance web applications using Next.js and React. My role involved transforming design wireframes into functional, visually engaging interfaces while ensuring responsive layouts across different devices. I integrated APIs for seamless data flow and collaborated closely with backend teams to streamline development processes. During my time at Purpose Black, I prioritized clean, maintainable code, contributing to key features and product enhancements that elevated user engagement.

IT support

dec-2023 - April-2024

Provided Tier 1 IT support to internal users at Purpose Black, delivering desk-side assistance. Ensured system security through software updates and vulnerability management. Diagnosed and resolved hardware and network issues, and managed the installation and support of workstation software, hardware, printers, phones, and mobile devices. Analyzed staff needs, identified vulnerabilities, and implemented efficiency-enhancing solutions.

Projects

Next.js Projects with API Integration

1) Kegeberew Import Export:

Implemented a platform for import/export businesses, integrating various APIs to manage product listings and transactions efficiently.

2) Kegeberew Bider:

Developed a bidding platform utilizing Next.js, with API integration for real-time bidding features.

3) China to Africa E-commerce:

Created a dynamic e-commerce platform, integrating APIs for product management and order processing.

4) Genesis Investment Bank (Next.js):

Built a banking solution using Next.js, featuring server-side rendering for improved performance and user experience.

5) Habesha Net:

Developed a job posting platform that connects job seekers with employers, utilizing API integration for job listings and applications.

6) Ethio Robo Robotics:

Designed a website showcasing robotics solutions with Next.js, ensuring responsive design and smooth user interaction.

7) True Mark:

Built an Ethiopian license document authentication system using Next.js, featuring API integration for secure verification processes.

8) Genesis Investment Bank:

Created a comprehensive banking solution for Ermias Amelga, focusing on user-friendly interfaces and secure transaction processing.

Full Stack Projects

1)Ermias Amelga Blog:

Developed a personal blog for the CEO and founder of Zemen Bank Ermias Amelga, utilizing the MERN stack (MongoDB, Express, React, Node.js) for dynamic content management.

React Projects

1)ERP System:

Assisted in the development of an enterprise resource planning system with API integration to streamline business processes.

2)Vision Insurance

Developed a web application that offers insurance services, featuring a clean interface and straightforward navigation.

3)Black Economy Excellence (BEE)

Created a platform promoting economic excellence and empowerment initiatives with an engaging user experience.

4)Invest in Poverty Initiatives

Designed a web application aimed at raising awareness and support for poverty alleviation initiatives.

5)Kegeberew Real Estate:

Built a responsive real estate web application, allowing users to browse and inquire about properties easily and also register online.

6)E.Visa

Developed a web application for visa consulting company to show their website and book appointments
